

How to edit and post the changes to the Internet

How to editing the pages and make the changes appear on the Internet.

Posting is a technical word for getting your changes to display on the Internet. Open the page that you want to change and click Edit Page.

Make the changes to the page. When you are ready to post the changes out to the Internet, push the Publish button.

After you have published the changes and you decide that you need to make more changes to the page, hit the Edit button. Make the changes and then hit the Publish button again.
