

# Logging Into Your new Windows XP Computer

Log into Novell using your Novell USERNAME and your Novell Password. If there is another username in the username box, backspace over it and type in yours. Make sure the “workstation only” box is NOT CHECKED. If it is, click on it to uncheck it.

Click OK. (The Novell graphic of the login box might look slightly different.)

Another Windows box should come up with the username of “Teacher” Do not change this. (If it is a student pc – it might say “student.”)

**LEAVE THIS PASSWORD BLANK**  
**PUT A CHECK IN THE BOX TO CHANGE YOUR WINDOWS PASSWORD TO MATCH YOUR NETWARE (Novell) PASSWORD.**  
Click OK

Later, when the Group Wise password box comes up, click cancel, another box will pop up and then put your name in the username box and your Group Wise password. Click ok.

Follow other instructions to rename your computer.
