

Energy Champions

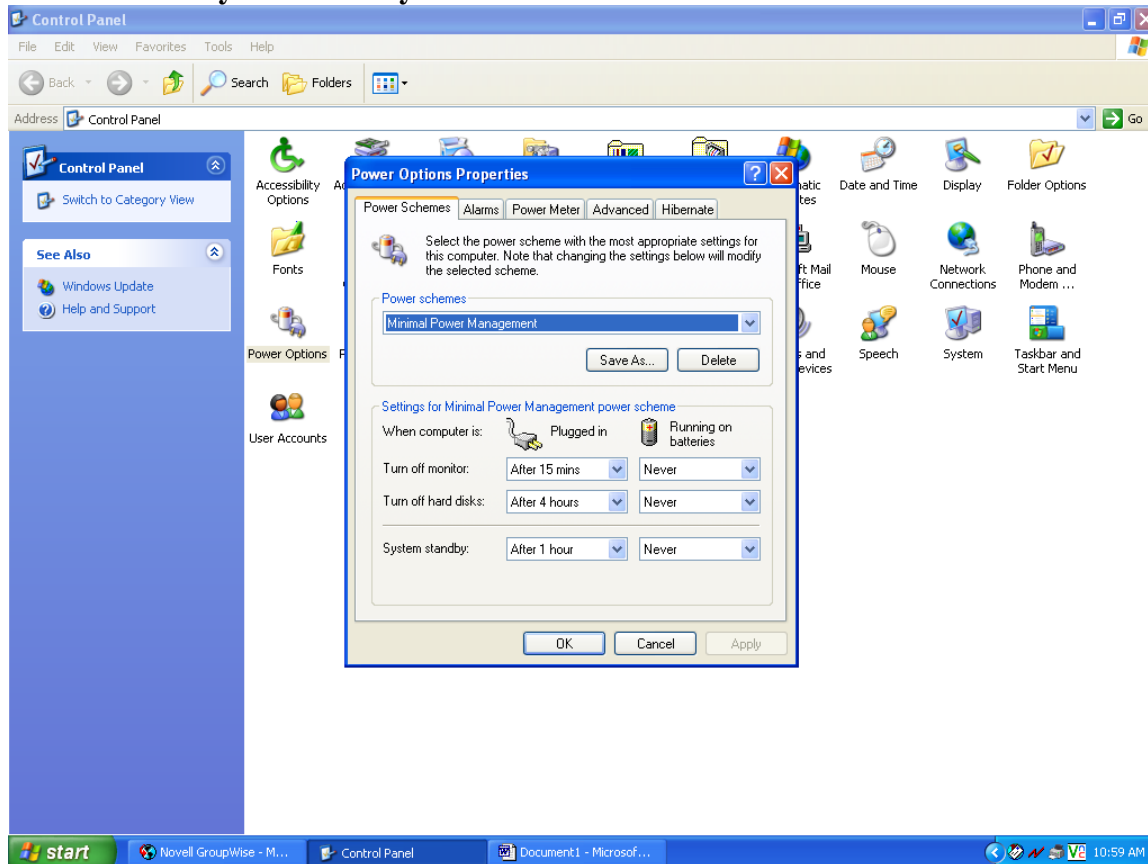

“Save the Power Campaign”

Step 1: From Control Panel select Power Options.

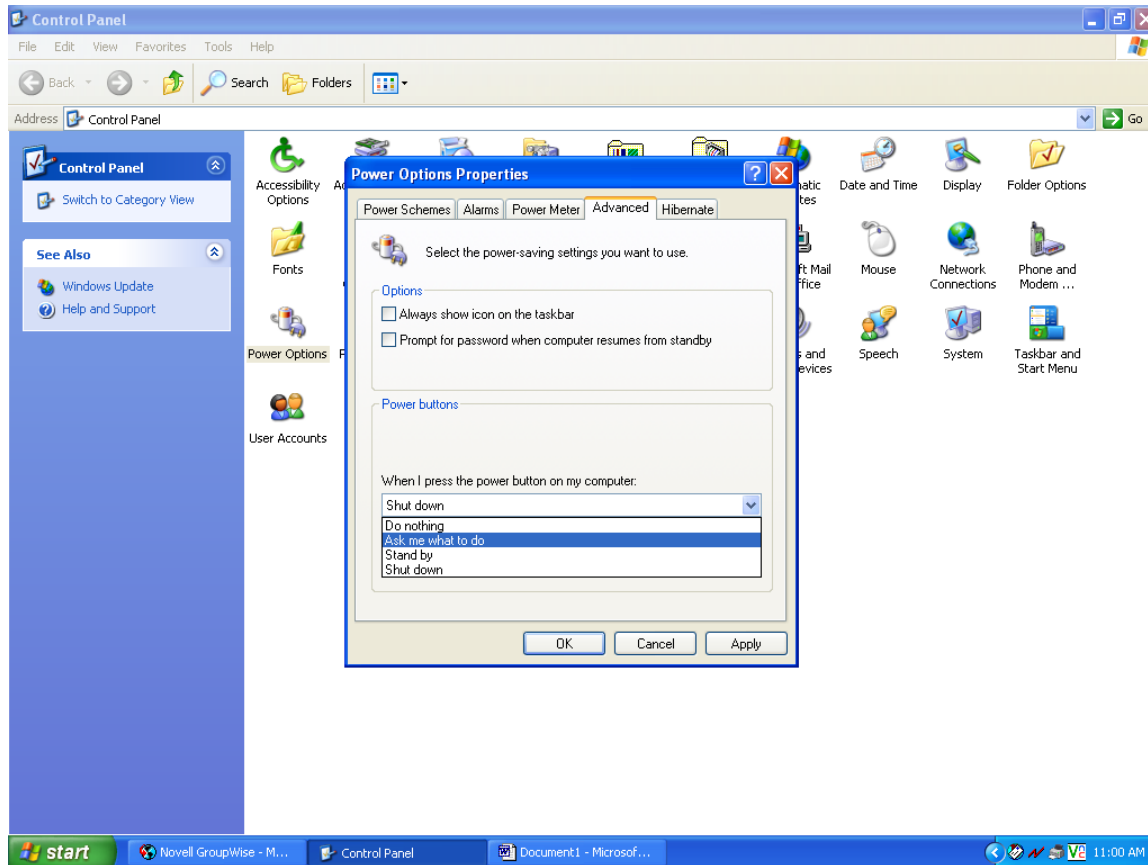

Step 2: Under the Power Schemes tab select Minimal Power Options. Under power management select the following options:

Turn off monitor: After 15 minutes
Turn off hard disks: After 4 hours
System standby: After 2 hours

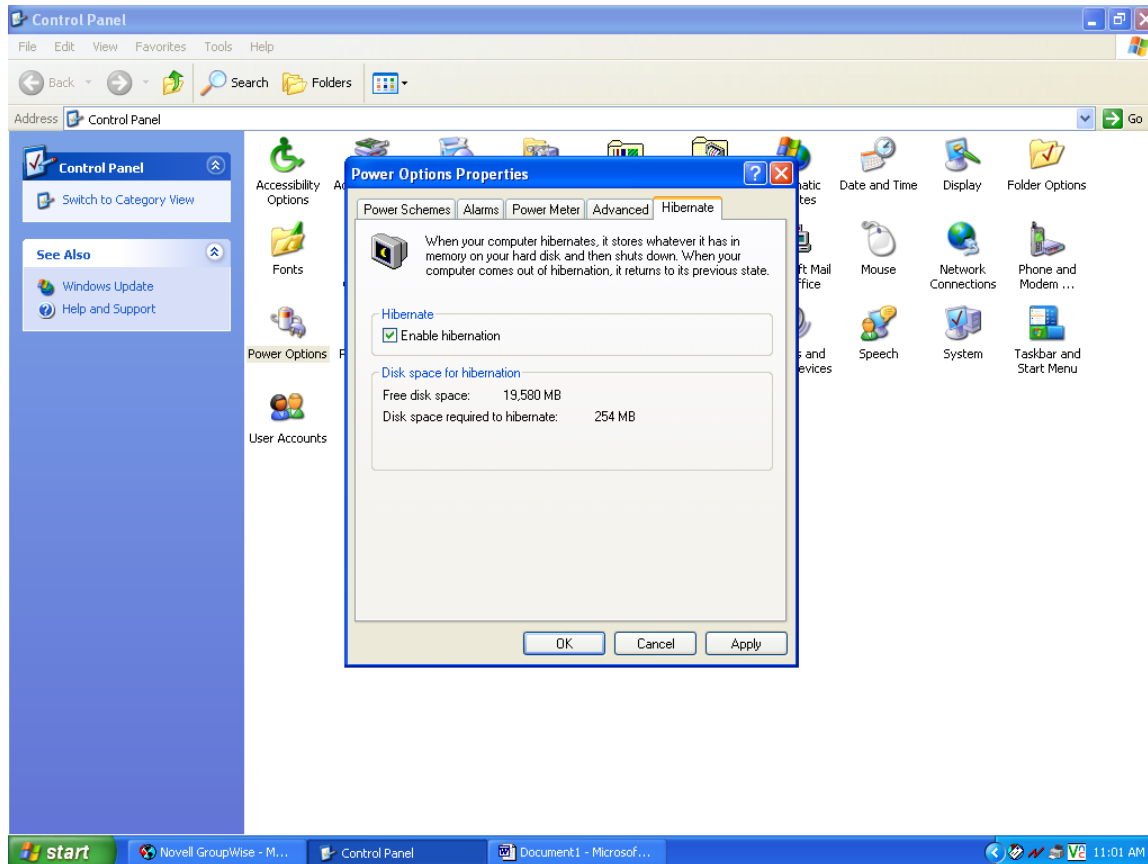

Step 3: When your computer goes into standby or hard disk shut-down, you will be required to hit the power button to restart. Under the Advanced Tab select the following option:

“Ask me what to do”, this will allow you to restart or shut down the system.

Step 4: Under the Hibernate tab, select “Hibernate.”

The Power Options can also be accessed through the Display Property icon found under the Control Panel.
