

Accessing the Internet from Home on a District-Issued iPad

If you are prompted to sign in when accessing the Internet from home:

Navigate to a website you have not visited (or you can go to Settings, Safari, Clear History and Website Data to refresh browsing history and then navigate to a website). You will get a screen that says Captive Portal. Enter your network username and password. Use the same password you use for a computer or Wi-Fi at school.

After you successfully authenticate you will be redirected to the website.

For assistance, please call the student help desk line at 817-299-2799.
